## Professional Summary

Full Stack Developer with 2+ years of experience building scalable enterprise applications using **Angular 18, Node.js, TypeScript, and MySQL**. Combines strong technical delivery with client-facing skills conducting weekly requirement demos, managing on-site client relationships, and preparing project budgets. Proven track record across ERP systems, analytics dashboards, and project management platforms.

## Technical Skills

|                               |                                                                                     |
|-------------------------------|-------------------------------------------------------------------------------------|
| <b>Languages:</b>             | TypeScript, JavaScript, SQL                                                         |
| <b>Frontend:</b>              | Angular 18, React.js, RxJS, Tailwind CSS, HTML5, CSS3                               |
| <b>Backend:</b>               | Node.js, Express.js, RESTful APIs, JWT, RBAC                                        |
| <b>Database:</b>              | MySQL                                                                               |
| <b>Tools &amp; Platforms:</b> | Docker, Swagger, Redis, Git, GitHub, Postman                                        |
| <b>Client Skills:</b>         | Requirements Gathering, Weekly Demos, Budget Preparation, Stakeholder Communication |

## Experience

### Full Stack Associate Developer

Sabado Technologies

June 2024 – Present

Bengaluru, India (On-site)

- **Led client-facing delivery** conducted weekly on-site demos, gathered requirements directly from stakeholders, and translated feedback into sprint tasks with zero miscommunication
- **Prepared project budgets** for development scopes, assisting effort estimation, resource planning, and presenting cost breakdowns to clients
- **Built a full-stack ERP system end-to-end** covering user management, inventory tracking, financial reporting, and workflow automation using Angular 18 frontend and Node.js/Express backend with seamless REST API integration
- Designed and implemented interactive analytics dashboards with drill-down filters and real-time data visualization, reducing report generation time for operations teams
- Implemented Villa Project Management module BOQ comparison, progress monitoring, monthly tracking, and automated reporting used actively production
- Secured all APIs using JWT authentication, Role-Based Access Control (RBAC), and protected routing; reduced unauthorized access incidents to zero
- Optimized Angular rendering performance across data-heavy modules, improving page load responsiveness and reducing UI lag noticeably for end users
- Contributed to Agile workflows architecture reviews, sprint planning, debugging, and deployment pipelines using Docker, Git, and Postman

### Frontend Developer Intern

GlobalShala

January 2024 – June 2024

Bengaluru, India (Remote)

- Built responsive UIs and reusable Angular components for web applications; integrated REST APIs and enhanced dashboard functionality
- Assisted debugging, frontend feature rollouts, and UI/UX improvements across multiple product modules

## Education

### Mohan Babu University

B.Tech Electronics & Communication Engineering

2016 – 2020

Tirupati, India

- CGPA: 7.5 / 10

## Key Strengths

- |                              |                                   |                                 |
|------------------------------|-----------------------------------|---------------------------------|
| • Full-Stack ERP Development | • Client Demos & Stakeholder Mgmt | • RESTful API Design & Security |
| • Angular 18 Architecture    | • Budget & Effort Estimation      | • Agile & Sprint Delivery       |
